- **React HacerRank**
- **JavaScript ES6 Progate**
- **SQL, Python HacerRank**
- **CCNA CISCO**
- **Decentralized Finance (DEFi) Infrastructure Coursera Offered by Duke University**

PROJECTS

Facial recognition in Attendance management system
The system maintains a quick and accurate record of the student/employee attendance and provides timely summaries and records whenever needed. Automation of the attendance system frees the authorities from mundane tasks and saves time. Face recognition algorithms can extract features from a face image namely positions of forehead, eyes, nose, mouth, chin, jaws

Restrology
A prospective business owner can use Restrology to see which cuisine-based restaurants are lacking or what type of Restaurants are doing well (due to their high number) in which neighborhoods
